(818) 354-4321

January 30, 2003

The Jet Propulsion Laboratory, on behalf of NASA, is pleased to announce final award of the Phase II Contract Option to eTouch Systems Corp, to implement their design and supporting technical solution for a full, operational deployment on February 1, 2003.

The OneNASA portal will be the primary gateway to NASA's web-based resources. The new OneNASA Portal will support NASA Administrator, Sean O'Keefe's, "One NASA" philosophy: NASA conducts many different research and development programs in a variety of locations, but these distinct programs ultimately account for the combined efforts of a single Agency with a common vision and mission. This portal should serve as a pre-eminent example of the President's Management Agenda's e-Gov initiative.

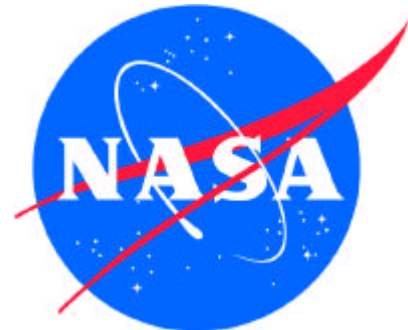

NASA's vision for the future is

- To improve life here
- To extend life to there
- To find life beyond

and contribute to our ability to

- To understand and protect our home planet
- To explore the universe and search for life
- To inspire the next generation of explorers

. . . as only NASA can

Sincerely,

A handwritten signature in black ink that reads "Greg L. Williams".
